Comment on Objection 686

This objection summarises well all the points I feel about the proposed boundary change abolishing North Sydney.

In particular the suggested alternative of merging Berowra and Bradfield is both logical and preferable to abolishing the historic seat of North Sydney.

Also highlighting point 4 - The forecast population growth makes the proposal short sighted. Just this week the Transit Oriented Development (TOD) scheme has announced more planned growth in the Crows Nest area within the existing seat of North Sydney.
